2023 APL Problem Solving Competition

Brian Becker - Chief Problem Maker
Dyalog LTD

Why?

Introduce students to APL

Plant seeds for the next generation of APLers

Increase APL's visibility

Identify potential recruits

The Past

2009

2010-2012

2019-2022

2009

Thank you Brooke Allen!

First 20 ProjectEuler.com problems

Mailing list of over 1600 contacts at universities and schools

2010-2012

Mostly self-written problems

2010 – Rent vs Buy plus 5 RosettaCode problems

Joel Hough, 2011 winner, inspires creation of TryAPL.org

2013-2018

Hosted and promoted by StudentCompetitions.com

Programming → Problem Solving

2 Phases

Phase 1 – ten "one-liner" problems

Phase 2 – more complex problems

2014 – non-student prize introduced

2016 – domain-specific Phase 2

2019-2023

2019 – Dogfooding

APL Problem Solving Competition

The Past

The Present

The Future

The Future

Details are being worked out

Goals

- Lower the bar

- Encourage more participation

2-4 Competitions Per Year

Anyone can win – not just students

Phase 2 disappears (sort of)

The Future

10 Phase 1-type questions only

3 trivial (e.g. produce a list of integers from α to ω)

3 easy (e.g. given a Boolean vector, turn all 1's after the first to 0)

4 harder (e.g. given a list of integers, return (odds)(evens))

Automated testing, immediate feedback

Participant gets one "entry" into cash prize drawing per correct solution

The Future

We're working out what replaces Phase 2

Domain-specific projects?

Bigger prizes

In 15 Years...

We've introduced APL to hundreds of newcomers

Got inspiration for
