

DYALOC

Glasgow 2024

EWC =
Everywhere
WC

Morten Kromberg

Why EWC?

1. Protect existing investments

- ◆ Since 1990, EWC has made it possible for domain experts to be "full stack" developers
- ◆ EWC is perhaps the most important reason why Dyalog has been successful
- ◆ EWC is restricted to the Microsoft Windows desktop, which is fading

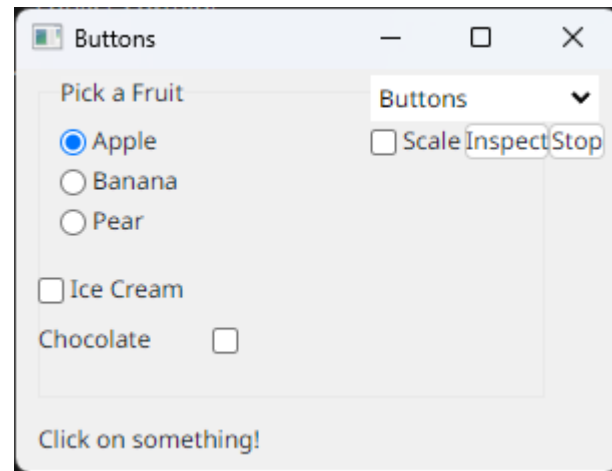

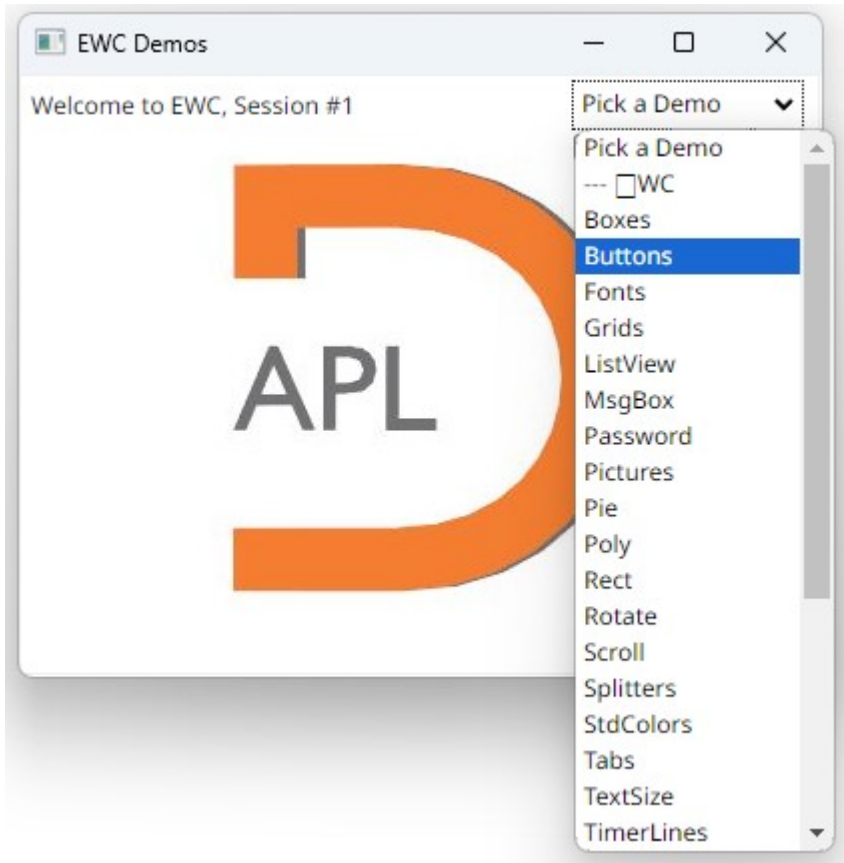

Why EWC?

2. Build New Applications

- ◆ EWC can easily be extended with JavaScript libraries
- ◆ Potential migration path for existing code to "responsive" layout
 - ◆ Replace Posn/Size with Flex CSS
- ◆ EWC is a uniquely interactive web development environment

Form

Initialising an EWC session

Once you have a folder on your machine containing EWC, you can load it into a Dyalog APL session (18.2 or later is required):

```
]link.import # /path/to/ewc
```

Where `/path/to/ewc` is the name of the folder that you created during [installation](#).

EWC.Init

The function `EWC.Init` takes a right argument of the mode that you want to enable:

- 'Desktop' to run each form in an HTMLRenderer
- 'Browser' to allow a single session from a browser
- 'Multi' to allow multiple sessions from browsers (more about that later)

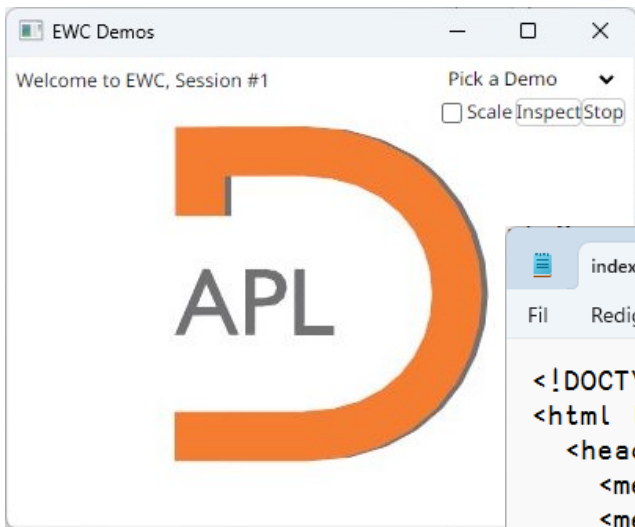

For example:

```
EWC.Init 'Desktop'
```

`EWC.Init` will also create cover-functions `ewc`, `ews` and so on, in the namespace from which `Init` was called. These are intended to be used as replacements for the system functions `□wc`, `□ws`, etc.

How Does it Work?

- Conga server is created listening on port 22322
- HTMLRenderer or Web Browser launched at <http://localhost:22322/index.html>

A screenshot of a web browser window showing the source code of "index.html". The code is displayed in a monospaced font. A box highlights the `src="/assets/index-a1c67c60.js"` attribute in a `<script>` tag. The status bar at the bottom shows "Ln 11, Col 27 | 381 tegn", "30%", "Unix (LF)", and "UTF-8".

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>EWC</title>
    <script type="module" crossorigin src="/assets/index-a1c67c60.js"></script>
    <link rel="stylesheet" href="/assets/index-5981879a.css">
  </head>
  <body>
    <div id="root"></div>
  </body>
</html>
```

```
(function(){const n=document.createElement("link").relList;if(n&&n.supports&&n.supports("modulepreload"))return;for(const g of document.querySelectorAll('link[rel="modulepreload"]'))o(g);new MutationObserver(g=>{for(const p of g)if(p.type==="childList")for(const C of p.addedNodes)C.tagName==="LINK"&&C.rel==="modulepreload"&&o(C)).observe(document,{childList:!0,subtree:!0});function a(g){const p={};return g.integrity&&p.integrity=g.integrity,g.referrerPolicy&&(p.referrerPolicy=g.referrerPolicy),g.crossOrigin==="use-credentials"?p.credentials="include":g.crossOrigin==="anonymous"?p.credentials="omit":p.credentials="same-origin",p}function o(g){if(g.ep)return;g.ep=!0;const p=a(g);fetch(g.href,p)}}();var Ot=typeof globalThis<"u"?globalThis:typeof window<"u"?window:typeof global<"u"?global:typeof self<"u"?self:{};function A8(t){return t&&t.__esModule&&Object.prototype.hasOwnProperty.call(t,"default")?t.default:t}function Gr(t){if(t.__esModule)return t;var n=t.default;if(typeof n==="function"){var a=function o(){return this instanceof o?Reflect.construct(n,arguments,this.constructor):n.apply(this,arguments)};a.prototype=n.prototype}else a={};return Object.defineProperty(a,"__esModule",{value:!0}),Object.keys(t).forEach(function(o){var g=Object.getOwnPropertyDescriptor(t,o);Object.defineProperty(a,o,g.get?g.enumerable:!0,get:function(){return t[o]}))},a)}var Il={exports:{}},jr={},Pl={exports:{}},_2={};/**

Classes

EWC has some degree of support for the following WC classes:

WC Classes			
BitMap	Grid	Menu	SubForm
Button	Group	MenuBar	TabButton
Circle	Icon	MenuItem	TabControl
Combo	Image	MsgBox	Text
Edit	ImageList	Poly	Timer
Ellipse	Label	Rect	TreeView
Font	List	Scroll	
Form	ListView	Splitter	

EWC has some degree of support for the following `QWc` classes:

QWc Classes			
BitMap	Grid	Menu	SubForm
Button	Group	MenuBar	TabButton
Circle	Icon	MenuItem	TabControl
Combo	Image	MsgBox	Text
Edit	ImageList	Poly	Timer
Ellipse	Label	Rect	TreeView
Font	List	Scroll	
Form	ListView	Splitter	

EWC adds the following classes not supported by `QWc` :

Additional		
ApexChart	RibbonButton	RibbonGroup
Ribbon	RibbonButtonGroup	RibbonGroupItem

Grid

The EWC implementation of `Grid` class has some degree of support for:

Properties			
Attach	ColTitleFCol	Input	TitleHeight
BCol	ColTitles	Posn	TitleWidth
CellFonts	CurCell	RowTitleBCol	VScroll
CellHeights	Event	RowTitleFCol	Values
CellTypes	FCol	RowTitles	Visible
CellWidths	FormatString	ShowInput	
ColTitleBCol	HScroll	Size	

Events		
CellChanged	CellMove	KeyPress

The EWC implementation of `class Grid` has some degree of support for:

Properties			
Attach	ColTitleFCol	Input	TitleHeight
BCol	ColTitles	Posn	TitleWidth
CellFonts	CurCell	RowTitleBCol	VScroll
CellHeights	Event	RowTitleFCol	Values
CellTypes	FCol	RowTitles	Visible
CellWidths	FormatString	ShowInput	
ColTitleBCol	HScroll	Size	

Being added as applications need them.

Significant Limitations

- Limited set of Classes & Props
- Coord Pixel only
- No direct assignment and reference to properties – must use `WS` / `WG`
- No creation using `NEW`
- Images and ImageLists are handled differently (better!)
- Validation and Error Messages weaker / different
- `NQ` may not behave exactly as under Windows
- Callbacks returning new event codes is questionable

Unsupported Features

- ◆ EWC tries to "ignore" use of missing features
- ◆ Get something up and running
 - ◆ Then modify your code or ask Dyalog to add support
- ◆ If you try to create an instance of an unsupported class

```
FOO[7] 'W0' eWC 'Widget' 'Hello World' ('Size' (300 400))
40:32.702 W: *** Warning: at FOO[7] - WC W0 - unsupported class "widget"
```

- ◆ The following still creates a form, ignoring the unsupported feature:

```
FOO[7] 'F0' eWC 'Form' 'Hello World' ('Size' (300 400)) ('Dockable' 1)
38:58.307 W: *** Warning: at FOO[7] - Unsupported on form: Dockable
```

Extensions

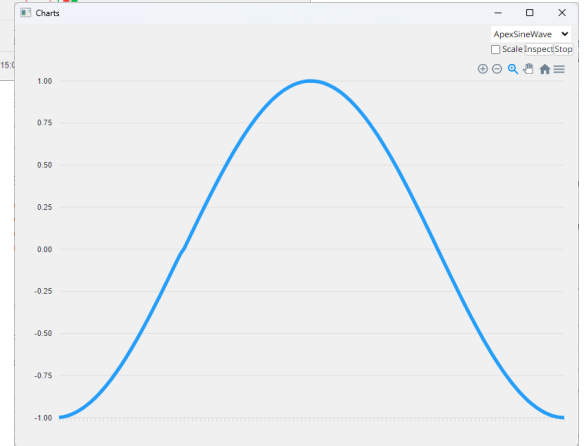

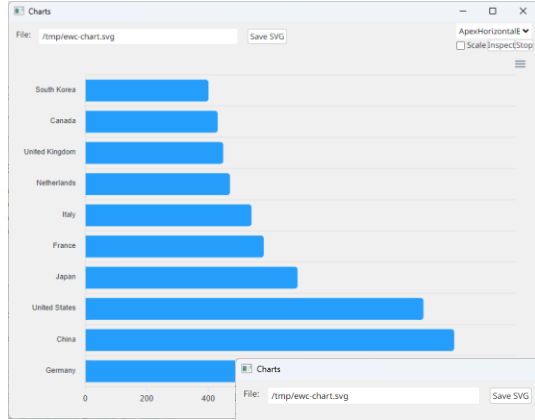

- ◆ Ribbon family of controls
- ◆ ApexCharts
- ◆ "Flex" instead of Posn + Size
- ◆ DIY Extensions
(KendoUI)

Ribbons

```
(rb, '.Item3')eWC'RibbonGroup' 'Exchange'('Size' 1)bordercol  
(rb, '.Item3.GroupItem1')eWC'RibbonGroupItem' 12  
(rb, '.Item3.GroupItem1.StockExchangeButton')eWC'RibbonButton' 'UK'('Size' 12)sel('ImageListObj' 'IL32')('ImageIndex' 2)  
  
(rb, '.Item4')eWC'RibbonGroup' 'Shares'('Size' 3)bordercol  
(rb, '.Item4.GroupItem1')eWC'RibbonGroupItem' 12  
(rb, '.Item4.GroupItem1.ButtonGroup1')eWC'RibbonButtonGroup'('Denmark' 'Blue')('ImageListObj' ('IL32' 'IL'))('ImageIndex'(1 3))sel  
  
(rb, '.Item5')eWC'RibbonGroup' 'Analysis'('Size' 6)bordercol  
(rb, '.Item5.GroupItem1')eWC'RibbonGroupItem' 12  
(rb, '.Item5.GroupItem1.ButtonGroup1')eWC'RibbonButtonGroup'('Red' 'Green' 'Blue')('ImageIndex'(1 2 3))sel  
  
eNQ'F1.TC.T1' 'Select'
```

ApexCharts – Four Demos

ApexCharts Design

- Options are passed straight through (JSON string or APL namespace)
- Series can be in several APL-friendly formats:

```
series+400 430 448 470 540 580 690 1100 1200 1380
```

```
cd+demodata.candledata  
time+1 12 DT (1 DT=4+TS)++\0, (~1+cd)p÷96 A Every 15 minutes from last hour  
series+(cd) time A (Matrix of Open High Low Close values) (X values)
```

```
series+(data 'Searches' months) (smoothed '3-month avg' ((window-1)↓months))  
A Triplets of (yvalues name xvalues)
```

ApexCharts SVG Property

- The SVG property allows us to retrieve the SVG for the chart
- Use ApexCharts in an invisible HTMLRenderer to generate charts

```
    #svg←'F1.BAR' eWG 'SVG'  
29820
```

```
    4 80psvg  
<svg id="SvgjsSvg1006" width="780" height="540" xmlns="http://www.w3.org/2000/  
g" version="1.1" xmlns:xlink="http://www.w3.org/1999/xlink" xmlns:svgjs="http:  
svgjs.dev" class="apexcharts-svg" xmlns:data="ApexChartsNS" transform="transla  
(0, 0)" style="background: transparent;"><foreignObject x="0" y="0" width="780
```

Extending EWC

```
1 import ReactApexChart from 'react-apexcharts';
2 import { useAppData } from '../hooks';
3 import { setStyle } from '../utils';
4 import { useEffect, useRef } from 'react';
5
6 const Chart = ({ data }) => {
7   const { Options, Posn, Series, Size, ChartType, Event } = data?.Properties;
8
9   const { socket, handleData } = useAppData();
10  const styles = setStyle(data?.Properties);
11
12  const chartRef = useRef(null);
13
14  useEffect(() => {
15    if (chartRef.current) {
16      setTimeout(() => {
17        const chartInstance = chartRef.current.chart.paper();
18        const svg = chartInstance.svg();
19        if (svg) {
20          localStorage.setItem(data.ID, JSON.stringify(svg));
21          handleData(
22            {
23              ID: data?.ID,
24              Properties: {
25                SVG: svg,
26              },
27            },
28            'WS'
29          );
30        }
31      }, 500);
32    }
33  }, [chartRef.current]);
```

```
35
36 const sendEvent = (event, chartConfig) => {
37   const obj = {
38     dataPointIndex: chartConfig?.dataPointIndex,
39     seriesIndex: chartConfig?.seriesIndex,
40     series: chartConfig?.config?.series,
41     xaxis: chartConfig?.config?.xaxis,
42     yaxis: chartConfig?.config?.yaxis,
43   };
44
45   const Event = JSON.stringify({
46     Event: {
47       ID: data?.ID,
48       EventName: event,
49       Info: [JSON.stringify(obj)],
50     },
51   });
52   socket.send(Event);
53 };
54
55 const options = {
56   ...Options,
57   chart: {
58     events: {
59       ...(Event?.some(item => item[0] === 'click') && {
60         click: (chartConfig) =>
61           sendEvent('click', chartConfig),
62       }),
63       ...(Event?.some(item => item[0] === 'legendclick') && {
64         legendClick: (chartConfig) =>
65           sendEvent('legendclick', chartConfig),
66       }),
67     },
68   },
69 };
70
71 return (
72   <div style={{ position: 'absolute', top: Posn && Posn[0], left: Posn && Posn[1], ...styles }}>
73     <ReactApexChart
74       ref={chartRef}
75       options={options}
76       width={Size && Size[1]}
77       height={Size && Size[0]}
78       type={ChartType}
79       series={Series}
80     />
81   </div>
82 );
83
84
85 export default Chart;
```

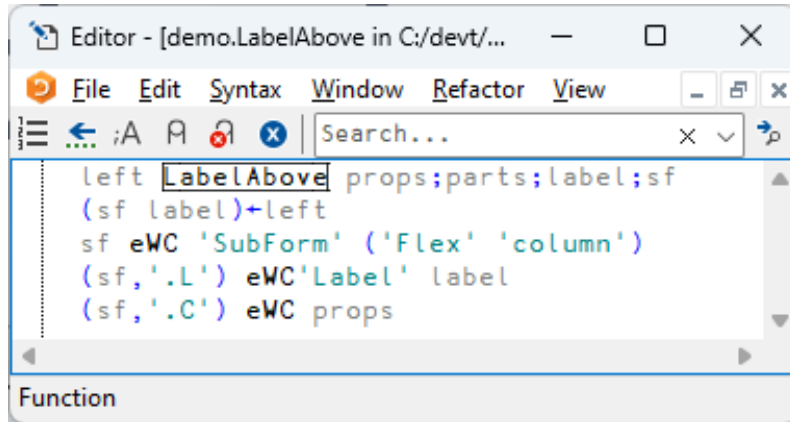

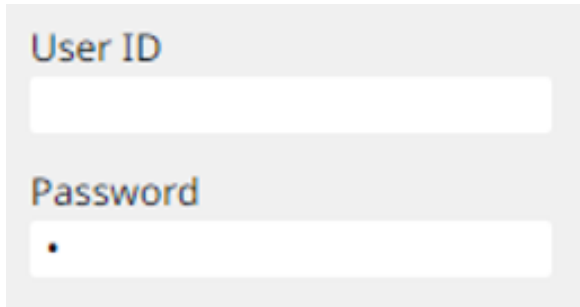

Flex – Instead of Posn & Size

- ◆ Still VERY experimental – Feedback Please!
- ◆ The Flex property can be set on containers
 - ◆ 'Flex' 'fill'
Form should fill the available space (Forms only)
 - ◆ 'Flex' 'row'
Stack controls horizontally (Any container object)
 - ◆ 'Flex' 'column'
No comment
- ◆ By default, 'fill' sets column orientation
- ◆ CSS property allows you to add additional CSS styling

SubForm = "StackPanel"

- ◆ A Subform with Flex becomes a "StackPanel"

```
'F1.INPUT.CREDS' eWC 'SubForm' ('Flex' 'column')  
'F1.INPUT.CREDS.USERID' 'User ID' LabelAbove 'Edit' ''  
'F1.INPUT.CREDS.PWD' 'Password' LabelAbove 'Edit' '' ('Password' '*')
```

```
left LabelAbove props;parts;label;sf  
(sf label)+left  
sf eWC 'SubForm' ('Flex' 'column')  
(sf, '.L') eWC 'Label' label  
(sf, '.C') eWC props
```

Everywhere

Multi User Mode

Intended for multi-user applications.

```
EWC.Init 'Multi'
```

- Must be called from a namespace which contains a function names `Initialise`
- Initialise MUST create and `eDQ` a Form (and `demo.Run` will do this)
- This namespace will be cloned for each new Browser connection, and `Initialise` will be called on a new thread
- Notice each user is suspended in `ΔDQ` in a namespace named `demo_n`.

```
demo.Run 'Multi'  
(lots of output as two sessions connect)  
  
    )si  
·   ·   #.EWC.ΔDQ[42]  
·   ·   #.demo_1.Initialise[13]  
·   &5

&4
```

Selenium Testing

The image shows a Selenium IDE test script in a debugger window. The script is written in a Gherkin-like syntax and includes several Selenium commands such as `S.Find`, `S.Click`, `S.WaitFor`, and `Check`. The code is designed to test a web application's feedback mechanism. A mouse cursor is visible over the script, and a 'Buttons' dialog box is open in the foreground, showing a list of fruit options: Apple (selected), Banana, Pear, Ice Cream, and Chocolate. The dialog also features a 'Buttons' dropdown menu with 'Scale', 'Inspect', and 'Stop' options, and a 'Click on something!' button at the bottom.

Current Status

Supported subset has been driven by the needs of two launch customers

- ◆ One converting a mature asset management system which needs to move off the Windows desktop
- ◆ One building new web components in APL to enhance an existing C#/JS based web app

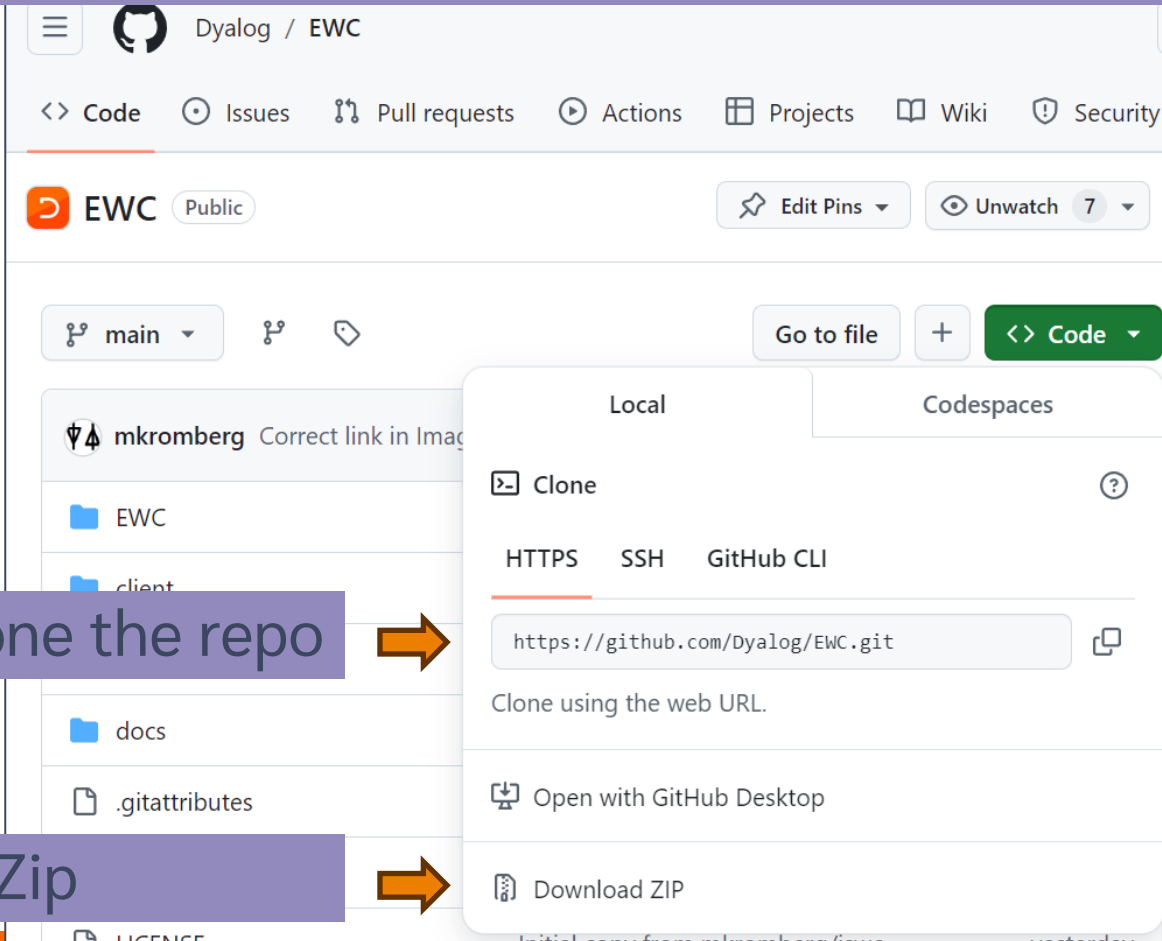

Both of these should be up & running very soon

EWC Status, Continued

- ◆ Worked on prototype for 12+ months with an external contractor
- ◆ Now Augmented with a full-time JavaScript developer
- ◆ Free and Open Source
 - ◆ We will document how to create your own extensions
- ◆ We expect to add features quickly this winter
 - ◆ Send us sample apps / tell us what you need!
